## CONTENTS

### BRIEF REPORT

**17 Microcosting Study of Prostate-Specific Membrane Antigen Positron Emission Tomography/Computed Tomography in Prostate Cancer**

Bonny Parkinson, Rajan Sharma, Varinder Jeet, Rachel Song, and Martin Hoyle

*The cost of prostate-specific membrane antigen positron emission tomography/computed tomography is approximately A\$1306.00 to A\$1554.77 per procedure—higher than the reimbursement rate—suggesting that patients will continue to face out-of-pocket costs.*

### ECONOMIC EVALUATION

**8 Modeling the Health and Economic Burden of Chronic Obstructive Pulmonary Disease in China From 2020 to 2039: A Simulation Study**

Jeong-eun Park, Luying Zhang, Yu-Fan Ho, Ge Liu, Rafael Alfonso-Cristancho, Afisi S. Ismaila, and Zafar Zafari

*The health and economic burden associated with chronic obstructive pulmonary disease in China is substantial and is predicted to increase further by 2039.*

**23 Reimbursement Savings Associated With Tissue Versus Mechanical Surgical Aortic Valve Replacement in Thailand**

Chanapong Kittayarak, Matt Reifenberger, Sarah Chan, and Eric L. Keuffel

*This Monte Carlo economic evaluation suggests that the Thai healthcare system benefits financially from the use of tissue valves compared with mechanical valves.*

**31 Cost-Effectiveness Analysis of Inguinal Hernia Repair With Mesh Performed by Surgeons and Medical Doctors in Ghana**

Jessica H. Beard, Zin Min Thet Lwin, Shilpa Agarwal, Michael Ohene-Yeboah, Stephen Tabiri, Joachim K.A. Amoako, Zoë Maher, Carrie A. Sims, Hobart W. Harris, and Jenny Löfgren

*Inguinal hernia repair with mesh performed by Ghanaian surgeons and medical doctors is a low-cost procedure and very cost-effective.*

**54 Cost-Effectiveness of Dulaglutide Versus Liraglutide for Management of Type 2 Diabetes Mellitus in Iran**

Mahna Ekhlasi, Saeed Taheri, and Nazila Yousefi

*Treatment of patients with type 2 diabetes mellitus with dulaglutide is more cost-effective than liraglutide and is associated with both more efficacy and less cost, from the health system perspective of Iran.*

- 70 Nutrition-Focused Care for Community-Living Adults: Healthcare Utilization and Economic Benefits**  
Suela Sulo, Bjoern Schwander, Cory Brunton, Gabriel Gomez, Juan Diego Misas, Daniela Alejandra Gracia, Diego Andrés Chavarro-Carvajal, Luis Carlos Venegas-Sanabria, and Carlos Cano-Gutiérrez  
*Addressing healthcare needs in older people is a universal goal. This study explores the impact of nutritional care on healthcare resource use and associated economic benefits.*
- 79 The Clinical and Economic Impact of a Nonavalent Versus Bivalent Human Papillomavirus National Vaccination Program in Taiwan**  
Hung-Hsueh Chou, Shu-Chen Chang, Isaya Sukarom, Kunal Saxena, Andrew Pavelyev, Ying hui Wu, and Chee Jen Chang  
*A nonavalent human papillomavirus vaccination program for girls aged 13 to 14 years would be highly cost-effective compared with the bivalent human papillomavirus vaccine.*
- 88 Direct Medical Costs and Healthcare Resource Utilization of Treating Patients With Two Clinical Subtypes of Axial Spondyloarthritis in Colombia**  
Pedro Santos-Moreno, Devian Parra-Padilla, Fernando Gómez-De la Rosa, María Carrasquilla-Sotomayor, Laura Villarreal, David Scott Jervis-Jálabe, and Nelson J. Alvis-Zakzuk  
*The authors found a significant difference in direct medical costs between radiographic and nonradiographic axial spondyloarthritis.*
- 109 Cost-Effectiveness Analysis of Pertuzumab Plus Trastuzumab and Docetaxel Compared With Trastuzumab and Docetaxel in the Adjuvant Treatment of Human Epidermal Growth Factor Receptor 2-Positive Metastatic Breast Cancer in Colombia**  
César Augusto Guevara-Cuellar, Elizabeth Parody-Rúa, María Paula Rengifo-Mosquera, Maria del Mar Conde-Crespo, and Jhon Maicol Nuñez-Castro  
*The addition of pertuzumab to the docetaxel plus trastuzumab regimen in patients with human epidermal growth factor receptor 2-positive metastatic breast cancer has a low probability of being cost-effective in the Colombian health system.*

#### HEALTH POLICY ANALYSIS

- 95 Analisis del proceso de Evaluación de Tecnologías Sanitarias del Sistema de Protección Financiera Para Diagnósticos y Tratamientos de Alto Costo en Chile (Ley Ricarte Soto)**  
Nicolás Armijo, Manuel Espinoza, Paula Zamorano, Daniela Lahoz, Tamara Yañez, and Carlos Balmaceda  
*Análisis del proceso de evaluación y recomendación de tecnologías sanitarias de enfermedades raras y alto costo en Chile.*

#### Mission Statement

Value in Health Regional Issues *provides a forum for the advancement and dissemination of research that examines the use of healthcare resources alongside the clinical and economic health outcomes of patient populations in Asia, Central and Eastern Europe, Western Asia, and Africa, and Latin America.*

### PATIENT-REPORTED OUTCOMES

**1 Translation, Cross-Cultural Adaptation, and Validation of the Polish Version of the Dizziness Handicap Inventory**

Grażyna Tacikowska, Elzbieta Gos, Anna Krupa, Magdalena Sosna-Duranowska, Natalia Czajka, and Piotr H. Skarżynski

*The Dizziness Handicap Inventory questionnaire is an essential self-assessment tool that quantifies the impact of vertigo on a patient's vital activity and is a significant indicator of handicap assessment for the physician.*

### POLICY PERSPECTIVE

**47 Capacity Building for Health Technology Assessment in Jordan: Institutionalization and Its Use in Pricing and Reimbursement Decisions**

Emad Almomani, Eman A. Hammad, Raeda AlQutob, Khawla Abu Hammour, Emad Al-Sharu, Muien Abu-Shaer, Ibrahim Alabbadi, and Zoltán Kaló

*This is a study on the milestones achieved and the use of health technology assessment in health policy decisions in Jordan.*

**102 Changes in the Number of Physicians and Hospital Bed Capacity in Europe**

Diána Elmer, Dóra Endrei, Noémi Németh, Lilla Horváth, Róbert Pónusz, Zsuzsanna Kívés, Nóra Danku, Tímea Csákvári, István Ágoston, and Imre Boncz

*Between 1980 and 2018, European Organisation for Economic Co-operation and Development countries experienced an increase in the number of practicing physicians and a reduction in the number of hospital beds.*

### PREFERENCE-BASED ASSESSMENTS

**62 Developing a New Region-Specific Preference-Based Measure in East and Southeast Asia**

Takeru Shirowa, Tatsunori Murata, Jeonghoon Ahn, Xue Li, Ryota Nakamura, Yot Teerawattananon, Zhao Kun, Asrul Akmal Shafie, Haidee Valverde, Hilton Lam, Kwong Ng, Mardiati Nadjib, Raoh-Fang Pwu, Ryan Rachmad Nugraha, Yong-Chen Chen, and Takashi Fukuda

*This study developed a new region-specific instrument, AP-7D, which is one of the first preference-based measures developed in the context of non-Western countries.*

SYSTEMATIC REVIEW

**39 Mathematical Models for Evaluating Effectiveness and Cost-Effectiveness of Cervical Cancer Control Policies in Populations Including Women Living With Human Immunodeficiency Virus: A Scoping Review**

Rowan Iskandar, Katayoun Taghavi, Nicola Low, Wichor M. Bramer, Matthias Egger, and Eliane Rohner

*Few model-based cervical cancer control evaluations have considered the impact of human immunodeficiency virus. Improvements in model transparency could facilitate their utility for other high disease-burden countries.*

CORRECTION

**78 Validating the “Treatment Satisfaction Questionnaire for Medication” in Persian and Evaluating Treatment Satisfaction Among Patients With Psoriasis**
